

Pharmacist-owner Susan Cochrane

Born and raised in the Annapolis Valley, I graduated from Horton District High School in 1982. In 1986, I graduated from Dalhousie University with a Bachelor of Science in Pharmacy.

I started practising my profession at Cochrane's Pharmacies in Canning, Hanstport and in Wolfville that same year (I had been working there as a student for three summers). I married my boss's son, Cameron in 1988. Cameron and I managed the family business from 1992 until 1998 when we came to Bridgewater after purchasing Bridgewater Pharmasave from Carl Streach.

My hobbies include many sports especially golf, walking, hiking, snow shoeing and cross country skiing. Getting our dog Rusty out for some exercise is a priority in our household! I appreciate the simple life: friends, family and food (lots of it!).

I enjoy working at Bridgewater Pharmasave because of our independence and our flexibility to make decisions. Our co-workers are like family. Cameron and I try hard to make Bridgewater Pharmasave a good place to work. Helping customers with their needs in the pharmacy and in our home health care department is rewarding - especially when we see their lives are a little less complicated with our help.
